

Considering a new Mail & Messaging system?

Here are questions any business should ask ...

- Is Windows NT one of your strategic operating system platforms?
- Is Windows NT considered to be the operating system of choice for your enterprise mail system?
- Do you have any LAN mail systems installed: MSmail, cc:Mail™, or GroupWise™?
- What challenges, if any, are you experiencing with these LAN Mail systems?
- What connections do you anticipate between your enterprise mail system and these LAN Mail systems?
- Do you have any host-based legacy mail systems installed? What challenges, if any, are you experiencing with these legacy systems?
- How do you plan to deploy Exchange?
- What are your plans to connect to the Internet?

Microsoft® Exchange

On DIGITAL™ Systems

**Get-it-right-the-first-time
Mail & Messaging**

Today's electronic Mail & Messaging systems must address four business needs ...

1. Increased functionality of the messaging infrastructure ... with reduced cost.
2. Easy migration while ensuring coexistence with existing mail systems.
3. Smooth integration of current business practices and applications into the new system.
4. Robust support for all major Internet standards, enabling users to quickly collaborate with virtually anyone, anywhere.

Can any one solution provide all this and more? Absolutely!

Microsoft Exchange on DIGITAL Prioris™ and AlphaServer™ systems fully addresses the major Mail & Messaging needs of businesses.

Microsoft Exchange integrates e-mail, group scheduling, electronic forms, and groupware applications on a single platform that can be managed with a centralized, easy-to-use administrative program. It is designed to make messaging easier, more reliable and more scalable. Because it supports a broad range of industry standards and protocols, Microsoft Exchange Server can be smoothly integrated into heterogeneous computing environments. Exchange 5.0 also delivers support for Internet protocols, allowing businesses to use Exchange as a key component of an intranet or Internet messaging and collaboration solution.

DIGITAL systems get it right the first time

Only DIGITAL offers the high performance, highly scalable messaging solutions that make DIGITAL systems a natural partner for Exchange.

In addition, value-added software and services from DIGITAL and its Business Partners help ensure that businesses receive a maximum return on their investment.

Broadest choice of scalable systems

DIGITAL Intel®-based Prioris and AlphaServer systems offer businesses the widest choice and broadest performance range in systems optimized for Windows NT™.

• Unmatched Performance

Prioris and AlphaServer systems from DIGITAL accommodate the largest number of users based on Exchange Load Simulator benchmarks.

• Highest Availability

A fail-proof system design along with advanced clustering technology insures

the highest level of systems availability and data accessibility.

• Easiest Manageability

ClientWORKS™ and ServerWORKS™ management tools from DIGITAL ease systems management dramatically.

• Unrivaled Support

DIGITAL has earned a reputation for world-class support and service. We're there when needed, 24 x 7 x 365. Period.
